**Attachments:** AMP360\_1555299.pdf; Albuquerque 2014 PM10 Raw Data.pdf

Dwayne, Here at the region we are having some challenges to completing this project. After our regional management signs the letter (see May 9 email), regional staff go into AQS and concur with the EE flags. That's the rub.

We ran two different AQS reports (attached). In the Raw Data AQS report, the May 7, 2014, flags Albuquerque put in for the subject monitor (35-001-0009) are indicator flags (non-caps). In another AQS report, Raw Data Qualifier, the May 7, 2014, flags are exclusion flags (caps). We are wondering if somehow 2 sets of flags got entered into AQS by Albuquerque.

In order for Region 6 staff to concur in AQS to the EE, we need the Albuquerque flags to be caps. We also need the 'NAAQS Standard' entered for the excluded hours (see the Raw Data Qualifier report). Can you go into AQS and see what you can see? Thanks

Dwayne, Attached is an electronic version of letter being mailed to the city. EPA R6 concurred on the demonstration.
